

FIND • FIX • REFOCUS

Fast clarity. Practical Focus. No Wasted Time.

Why it exists

Running a business often means you're so busy in the day-to-day that working on the business slips down the list. Small inefficiencies pile up, time leaks away and costs creep higher than you'd like.

Most consultancy support looks expensive, slow and heavy-handed, which puts many leaders off getting help until problems are already painful.

The Hive Health Check exists to change that. It's quick, affordable and outcome-driven. Just half a day to cut through the noise, show you where time and money are being lost and give you a focused plan to fix it.

Who it's not for:

- Businesses looking for a long report to gather dust
- Leaders who already have complete clarity on what to fix and how
- Teams wanting full training or coaching (you can jump straight to the Bee's Academy for that)

Who it's for

- Owners and leaders who want clarity without committing to long programmes
- Teams who need evidence of inefficiency before investing in bigger change
- Businesses that want a low-risk, no-nonsense starting point
- Anyone curious about the Hive of Things and how it could work for them

What it delivers (in just half a day)

- A **clear picture** of where time and money are slipping away
- The **impact in plain numbers**, not vague ideas
- A **shortlist of priorities** – where to focus first for the biggest gains
- **Practical next steps**, not theory
- The confidence to choose your **best-fit path forward**

Where it fits

The Health Check is your first step into our Hive of Things services – a standalone service worth £995. If you move forward, that full amount becomes a credit against your next step in the Hive:

- Hive Method: for targeted fixes
- Hive Foundations: to standardise and scale
- Hive Fusion: a blended path built around you

Or, if building skills and capability is the priority, you can head straight into the Bee's Academy for training and coaching – no Health Check required.

Your Next Move, Your Way

The Hive Health Check is designed to give you clarity fast

Though it's not the only option to get improvement cracking. Think of it as a springboard - a way to shine a light on where time, money and energy are vanishing. From there, you can choose the service that best fits your context.

Some clients start with the Health Check. Others jump straight into Method, Foundations, Fusion or the Academy. It's not frame-worked or rigid, it's built to meet you where you are.

If you need this....	Then go here	Why it matters
A stubborn problem that demands action	<u>Hive Method</u>	Solve your biggest bottleneck in weeks - free up time & cash now
Your business is growing and needs structure	<u>Hive Foundations</u>	Standardise, reduce rework & make scaling smoother
You need a custom blend of support	<u>Hive Fusion</u>	Tailor a hybrid path that evolves with your goals
You want your team to own improvement	<u>Bee's Academy</u>	Equip your people with skills so change sticks beyond projects

Why this matters for you

- No wasted spend: If you choose the Health Check, your £995 goes straight into the next step making it an investment, not an extra fee
- Options, not obligations: You can enter where it makes sense – quick fixes, structure, blended support, or training. The Health Check is helpful, not mandatory
- Real business impact - every option is designed to save you time, cut costs, reduce rework and build confidence in your team

Your next step

The path is yours. Start with the Health Check if clarity is what you need now, or move directly into the service that's already calling your name. Either way, the Hive of Things is designed to give you practical, lasting results – faster
